Summary

Detail-oriented Computer Science undergraduate with a solid background in Data Structures and fundamental programming concepts, looking for an entry-level position as a Software Engineer in a growing company. Skilled in frontend and full-stack web development, API integration, and performance optimization. Uses systematic problem-solving and automation to develop scalable and optimized solutions for real-world projects. Strong communication skills with the ability to collaborate effectively across teams and convey technical concepts clearly to both technical and non-technical audiences.

Education

Bachelor of Technology — Computer Science & Engineering

CMR Institute of Technology | Nov 2021 – May 2025 | GPA: 7.6

Technical Skills

- Languages: C, C++, Python, Java, JavaScript
- Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap, Vite
- Backend & APIs: PHP, MySQL, Google Apps Script
- Automation: Selenium
- Tools: Git/GitHub, Figma, WordPress
- Soft Skills: Strong verbal and written communication, teamwork, and presentation skills

Experience

UI Developer – Intern | 8 Views, Madhapur Oct 2025 – Present

- Developed and deployed responsive, performance-optimized, and SEO-friendly web pages using HTML5, CSS3,

JavaScript, Bootstrap, Tailwind CSS, and WordPress.

- Implemented large-scale SEO automation through custom scripts for mass meta tag and image updates, enabling efficient optimization across multiple pages.
- Optimized website performance to 80%+ PageSpeed scores by improving Core Web Vitals (LCP, FCP, Speed Index), implementing lazy loading, and using WebP media formats.
- Integrated Google Sheets API and PHP for automated lead processing.
- Managed deployment via FTP, Live Server, and WinSCP with systematic debugging, incremental deployment, and backup procedures.

Web Development Intern | Swechha Organization May 2022 – Jun 2022

- Redesigned and implemented a responsive layout for the company blog using HTML, CSS, and JavaScript.
- Added dynamic search functionality and social media integration.
- Enhanced usability, reducing navigation time between content sections by 30%.
- Used GitHub for version control and task management.

Projects

Portfolio | nischay-reddy.vercel.app

Built a Next.js and React portfolio with modular components, dynamic imports, and GSAP scroll-based animations. Implemented ultra-gradient backgrounds and optimized assets for performance and responsiveness.

Text Tone Picker | text-tone-picker.netlify.app

AI-powered text tone conversion tool using Mistral AI to transform content into formal, informal, friendly, or professional tones.

Electrify Hyderabad | electrify-hyd.com

Responsive promotional website for a CII Electric Car Exhibition, built in 2 days. Integrated Google Apps Script to capture visitor leads directly into Google Sheets.

SunnySide | weather-now-aganitha.netlify.app

React + Vite weather application using the Open-Meteo API with real-time updates, 7-day forecasts, trends, and personalized recommendations.

Foodievery | foodievery.netlify.app

Responsive food-ordering web application focusing on API integration and UI/UX design.

Real-Time Facial Emotion Detection System | [GitHub](#)

Real-time facial emotion recognition system using MobileNet-based transfer learning to classify 5 human emotions from live webcam input. Implemented OpenCV + Haar Cascade for face detection with data augmentation and fine-tuning for improved accuracy.

Certifications

- Data Structures & Algorithms — Internshala
- AWS Academy Machine Learning Foundations — AWS Academy
- AICTE Cloud Virtual Internship
- AICTE AIML Virtual Internship

Additional Information

- Languages: English, Hindi, Telugu
- Interests: UI Engineering, Performance Optimization, API Development
- Standardized Test Scores: IELTS – 7.0 | GRE – 318
